

THE CENTER FOR TROPICAL ECOLOGY & CONSERVATION
& ANTIOCH UNIVERSITY NEW ENGLAND

Conducting Practica and Research in International Locations, A Panel Discussion

*Want to learn about conducting practica and master's research in the tropics?
Please join Antioch master's students for a discussion. Feel free to bring questions!*

Where:

Sci Lab I

When:

Thursday

December 10

Time:

12:00-12:30pm

Note:

The panel discussion will be held in conjunction with the Con Bio program meeting. Anyone is welcome to join at 12!

James Burke

Program: Teacher Cert

Practicum: James spent last summer's practicum working in the Tropical Deciduous forests in the southern tip of the Sonoran desert. From a base in Alamos, Mexico, he developed protocols for a year-long insect phenology study with his friend and college professor, Robert Harrill of Conservation SOS while also doing some creative writing and curriculum design.

Phillip Howard

Program: Conservation Biology

Practicum: Phillip's practicum consisted of documenting high quality cocoa on the island nation of Grenada to determine environmental and social factors influencing distribution of cocoa varieties, establishing a base-line for future gastronomic analysis of cocoa varieties, and promoting conservation of high quality cocoa for both economic and biological value.

Sarah Stoner-Duncan

Program: Individualized

Practicum: Based at Hawaii Park on the southern Pacific coast of Guatemala, Sarah conducted nightly sea turtle patrols, worked with the community to address mangrove and sea turtle conservation issues, and helped develop environmental education lessons for the local primary schools.
