

THE CENTER FOR TROPICAL ECOLOGY & CONSERVATION & ANTIOCH UNIVERSITY NEW ENGLAND

PRESENTS:

**Conservation at the wildlife-livestock-human interface:
Assessing the socioeconomic impacts of zoonotic diseases and
water scarcity on the livelihoods of pastoral and agropastoral
communities in the Ruaha Landscape, Tanzania**

Please Join Speaker:

Michel Masozera

Michel is a doctoral student in Natural Resources at the University of Vermont. He has more than 10 years experience of conservation in Rwanda. He has served as Rwanda's country program director for Wildlife Conservation Society (WCS) and as a team leader on a number of projects. His talk will discuss his current work in Tanzania.

Thursday, November 20, 2008
Science Lab I at 11:30 am - 12:30 pm
